## A brighter, bolder *season*

---

Spring is finally here and House Doctor welcomes the season with open arms. A bit bolder with patterns and colours, the designs let in the light and give your interior style a twist. From soft rugs to statement lighting and home décor, this season's collection is where unexpected details and refined materials meet.

Add a sense of lightness to your home with new glass vases and tealight holders. Ranging from clear to light green and brown, they add interest to your décor with their subtle detailing. Consider for a moment how indents, swirls or uneven edges of the glass have as they interact with the light in your room.

As it gets warmer, the boundary between indoors and outdoors fades away. Life gradually moves outside and this collection sets the scene for cosy evenings with throws and informal dinnerware.

Set the table with Rain, bowls, plates and glasses in two refreshing colours. Together with the casual placemats and napkins, the evening is secured. Throw in the new string lights to underpin the welcoming atmosphere and make the evening last longer.

Enjoy a carefully curated collection which sets the right mood for Spring. Adventurous and daring, but still with the unmistakable House Doctor twist.
